- **National Library of Medicine** (<http://www.nlm.nih.gov/>): The National Library of Medicine (NLM), in Bethesda, Maryland, is a part of the National Institutes of Health, US Department of Health and Human Services (HHS). Since its founding in 1836, NLM has played a pivotal role in translating biomedical research into practice. It is the world's largest biomedical library and the developer of electronic information services that deliver trillions of bytes of data to millions of users every day. Scientists, health professionals, and the public in the US and around the globe search the Library's online information resources more than one billion times each year.

- **PLOS Medicine** (<http://www.plosmedicine.org/home.action>): *PLoS Medicine* is the leading open-access medical journal, providing an innovative and influential venue for research and comment on the major challenges to human health worldwide. We specifically seek to publish papers which have relevance across a range of settings and that address the major environmental, social, and political determinants of health, as well as the biological.
- **American Medical Association** (<http://www.ama-assn.org/>): The American Medical Association helps doctors help patients by uniting physicians nationwide to work on the most important professional and public health issues. AMA policy on issues in medicine and public health is decided through its democratic policy-making process, in the AMA House of Delegates.
